ABOUT US

HyperTree Consulting was established to provide innovative solutions to our clients in a further resource effective and efficient way that keeps businesses one-step ahead at all times.

Faith brought a group of passionate people who shares the same dream and passion together. With such mutual goals, the team formed a research and development team (R&D) to provide professional advice and solutions to our clients.

At **HyperTree**, we know that businesses require quality, well-planned IT systems to prevent downtime. We develop reliable, long-term IT solutions which limit ongoing and unnecessary expenses associated with "quick fix" products.

We believe the most important aspect of information technology services is not just providing the latest software & hardware but the partnership we develop between ourselves and our customers. We plan with our clients and go the extra step to ensure that IT systems we create keep up with the needs of growing businesses.

Driven by the objective of Green Environment, the adherence on the concept of "paperless" is one of the ways and also our expertise to help Mother Earth. This adherence is the motivation and value that we hold on to carry out solutions that tailor each client's needs.

KEY HIGHLIGHTS

OBJECTIVE

At HyperTree, we focus on delivering quality system solutions and recruiting services for our clients. Our primary goal is to provide quality and reliable system solution for our clients. Besides that, we reach our objective of customer satisfaction with our highly professional technical skills and creative ideas. With years of experience and creative mindset, we attend to our clients' needs on the latest technology.

VISION

To become the leading e-Solutions provider in Southeast Asia.

MISSION

To research, develop and provide quality solutions and services to our clients in a further resource effective and efficient way that keeps businesses one-step ahead at all times.
